

Flirc Raspberry Pi 5 Case

Discover the perfect housing for your Raspberry Pi 5. We've provided access to the power button and enhanced it with LED support. Relish the familiar aluminum core heatsink you came to love, nestled between two matte black, soft-touch panels. Tailored to fit right into your entertainment setup.

What's in the box!?

We include everything you need. The Raspberry Pi 5 case, a high efficient thermal pad and for your convenience four screws.

Built-in Heat Sink!

This is the first affordable Raspberry Pi case made out of aluminum. We wanted to ensure we didn't sacrifice form over function, so we used the aluminum housing of the case to provide a built in heat sink. Supplied with the case is a thermal pad and 4 screws for the simplest Raspberry Pi case assembly on the market. It only takes seconds to drop your Raspberry Pi into it's amazing new home and show it off on your counter.

Stability and Access

We included rubber feet to raise the enclosure so it just hovers underneath your television. In addition to the built in heat sink, small ventilation slots on the bottom help keep the Raspberry

Pi cool. GPIO pins are accessible through the slot on the bottom of the case and there is no need for disassembly to get to the SD card. We know you will love the attention to detail we put in throughout the case.

Power Button and LED Support

The Raspberry 5 power button is natively supported on the Raspberry Pi 5 case by Flirc. Activity LEDs are also clearly visible.

Family of Pi Cases

We've made cases for the Raspberry Pi 4, 3, and Zero as well! Make our cases a part of your family.
